Setup

CLI tools

The following CLI tools are required for running the exercises in this tutorial. Please have them installed and configured before you get started with any of the tutorial chapters.

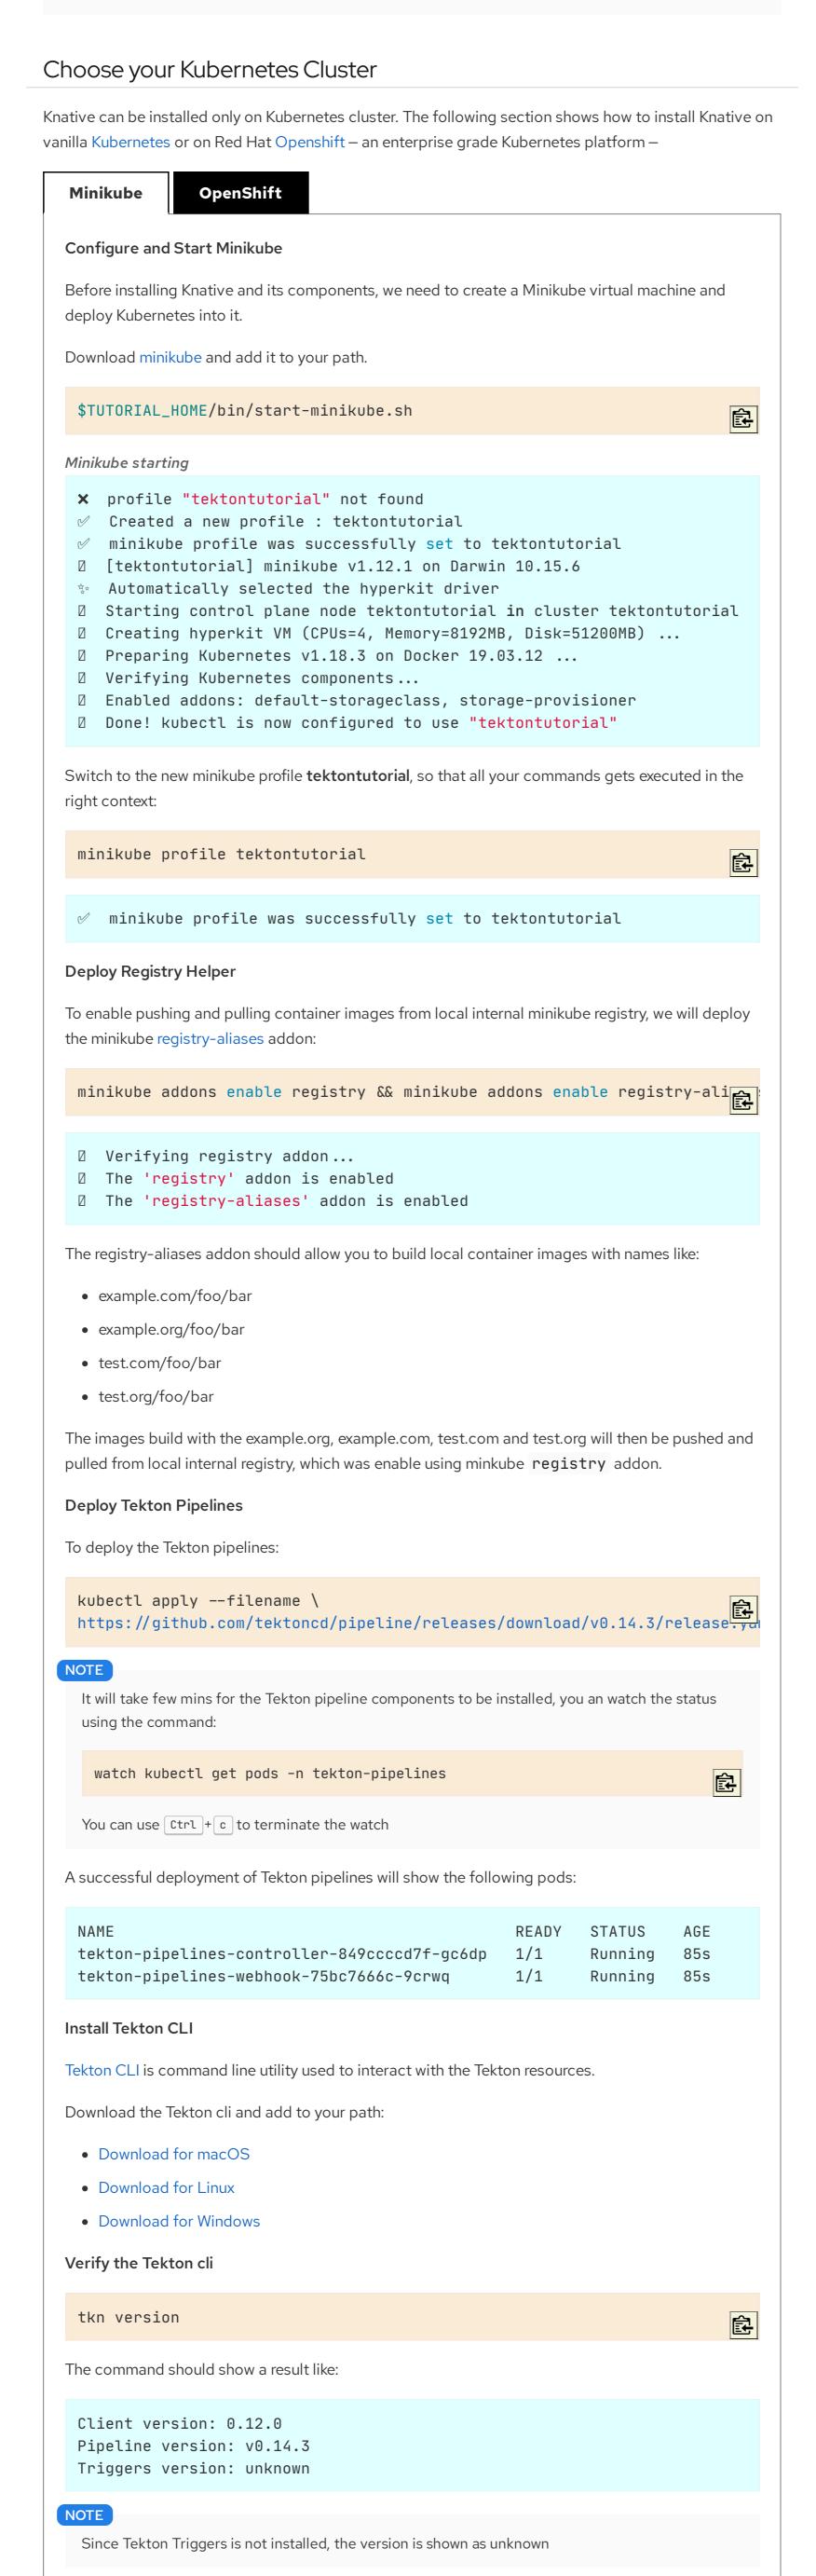

Download Tutorial Sources

Before we start setting up the environment, let's clone the tutorial sources and set the TUTORIAL_HOME environment variable to point to the root directory of the tutorial:

Before we start setting up the environment, let's clone the tutorial sources and set the TUTORIAL_HOME environment variable to point to the root directory of the tutorial:
